"-"denotes that samples are negative.  
"+"denotes that samples are positive.

A positive culture is a direct evidence of the target organism. On the other hand, ELISA and PCR methods provide an indirect evidence of the organism. Due to sampling errors and limitations of the methods, the results may not be absolute. Therefore, Cal-SPL makes no representation of warranty, expressed or implied, for its testing services or the results issued. Under no circumstances shall the liability of Cal-SPL exceed the amount paid for this analysis.
